

Why PowerSuite's UnifySquare Solution?

Help Desk

Reduce troubleshooting time and improve end-user satisfaction by providing actionable and prescriptive guidance regarding various usage and adoption issues.

Tracking

Identify and track a customized and targeted set of Execs, VIPs or even conference rooms so that IT can stay ahead of any potential issues or problems occurring

Benchmarking

Use the power of crowdsourced cloud intelligence to compare anonymized WSC and UC performance KPI's across multiple sites and between different users and platforms.

Problems & Insights

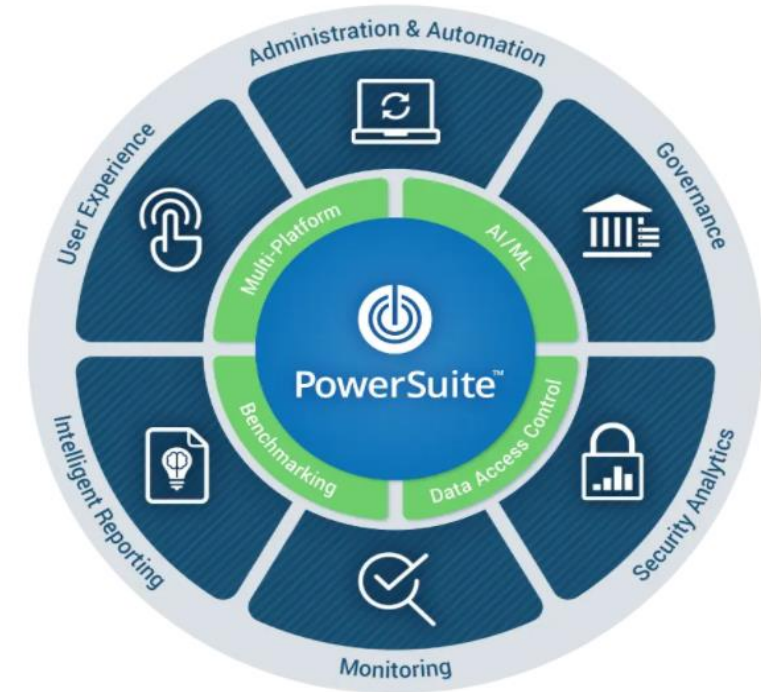

AI/ML analyzes platform data to create a centralized hub to view problems and insights to help prioritize troubleshooting and identify system anomalies.

Usage & Adoption

Track and accelerate the progress of usage for meetings, chats and calls across multiple platforms at the same time —visualize the full adoption profile of your entire enterprise.

Policy Management

Leverage PowerSuite's comprehensive policy framework and functionality to create policies to simultaneously cover ALL collaboration platform security and workflow needs.
